# FUNÇÃO DO 1º GRAU/AFIM

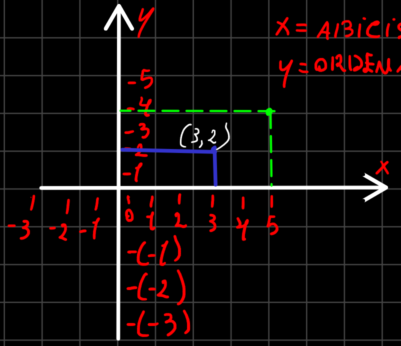
$f(x) = ax + b$
$y = ax + b$

EM QUE $x \in \mathbb{R}$

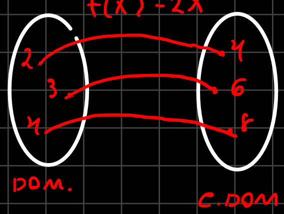
$a \neq 0$

"PERTENCE"

$x$ = ABICISSAS
$y$ = ORDENADAS $(x, y)$



$f(x) = 2x$



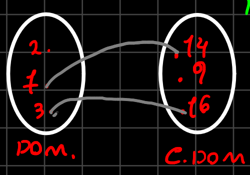


IMAGEM = ♡ → SOU DA MINHA MULHER
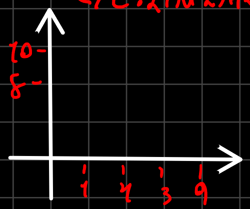
※ SOU DA MINHA MULHER
※ SOU DA MARY

$im = \{14, 16\}$

$f(x) = ax + b$
→ C. ÂNGULAR ($a$)
→ C. LINEAR ($b$)



$f(x) = \underline{a}x + b$

Ex: TÁXI – TAXA INICIAL = R$ 5,00
– TAXA P/ KM = R$ 3,00 → VARIÁVEL

→ $x$ = Nº DE KM.

$P(x) = 3.x + 5$
→ $P$ = PREÇO

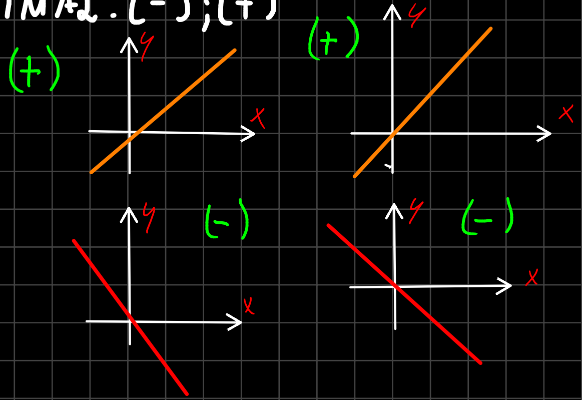
$\boxed{P(x) = 3x + 5}$

CORRIDA COM 12 KM, QUAL SERÁ O PREÇO?

$P(12) = 3.12 + 5$
$P(12) = 36 + 5$
$P(12) = 41$ ou $y = 41$

$\boxed{\text{PREÇO TOTAL} = R\$\,41{,}00}$

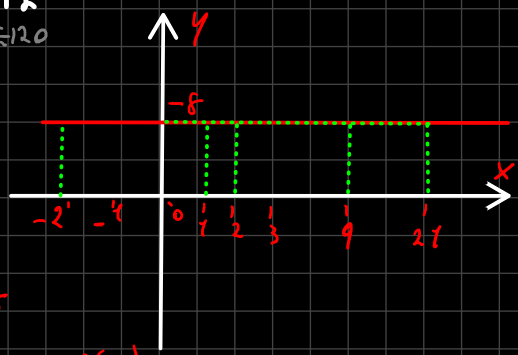
SINAL: (–); (+)



FUNÇ. CONSTANTE → $f(x) = b$

$f(x) = ax + b$ → ZERO ($a$ = 0)

$f(x) = b$
$f(x) = 8$



$f(x) = 8$

| $x$ | $f(x)$ |
|---|---|
| 21 | 8 |
| 1 | 8 |
| 9 | 8 |
| -2 | 8 |
